SUMMARY

Senior DevOps / Platform Engineer with 10+ years building and running enterprise CI/CD and cloud infrastructure — in banking and high-volume e-commerce, where deploys have to be boring and failures are expensive. AWS Certified Solutions Architect, deep with OpenShift/Kubernetes and a broad delivery toolchain.

I run production-grade infrastructure at home — GPU model serving, GitOps, mesh networking — and got into DevOps because I hate doing the same thing twice: if it's tedious and repetitive, I automate it. Open to senior IC roles across Platform, SRE, Cloud and MLOps.

KEY SKILLS

CI/CD	Harness, Jenkins, UrbanCode Deploy, TeamCity, GitHub Actions (OIDC), AWS CodePipeline & CodeBuild	AWS	S3, CloudFront, ACM, Route 53, IAM, VPC, Lambda, CloudWatch
IaC	Terraform (reusable modules, remote state), Ansible	Containers	Docker, Kubernetes, OpenShift, Helm
Automation	Python, Bash, Groovy — build, deploy & toil removal	Platform	Linux, Caddy, Tailscale, TLS/OIDC, secrets mgmt, Prometheus/Grafana

EXPERIENCE

Citi — DevOps Engineer

Nov 2023 – Present · Santiago, CL

- ▶ Onboarded and standardized CI/CD pipelines for 12 application & data teams, later extended to 6+ more — across Jenkins, TeamCity, UrbanCode Deploy and Harness.
- ▶ Delivered 2 internal platform migrations, notably Bitbucket → GitHub.
- ▶ Built a self-service dashboard to fast-track common delivery requests. Fully English-speaking environment.

Kibernum — DevOps Engineer

Apr 2023 – Nov 2023

DevOps consulting engagement — CI/CD and cloud automation for client delivery.

carsales.com.au — DevOps Engineer

Apr 2021 – Apr 2023 · Remote

- ▶ Migrated CI/CD pipelines from Jenkins to GitHub Actions for a high-volume online marketplace.
- ▶ Built a reporting automation serving every dealer partner associated with carsales across LATAM.

Aligare — Systems Support → Systems Administrator

Apr 2019 – Mar 2021 · Santiago, CL

- ▶ Managed infrastructure across multiple AWS accounts — built CI/CD pipelines and provisioned environments for new clients.
- ▶ Delivered automations that cut SLA response times by 70%; unified operational visibility by integrating disparate services.

Atentus — Software Development & Database Analyst

May 2016 – Apr 2019

- ▶ Built a script that automated ~80% of manual support work and proactively prevented ~60% of routine incidents.
- ▶ Added end-to-end process visibility via email integration; wrote PostgreSQL stored procedures for reporting.

Earlier: Software Engineer / L2 support at **AKZIO Consultores** (2013–2016), telecom sector.

SELECTED PROJECTS (SELF-DIRECTED)

julayo-dev.com – AWS static site, 100% IaC

[AWS] [Terraform] [CodePipeline]

Portfolio/CV defined entirely in Terraform: private S3 bucket served through CloudFront (Origin Access Control), auto-renewing ACM certificate, Route 53 DNS. Deployed by CodePipeline → CodeBuild.

delete-from.com – keyless CI/CD (OIDC)

[GitHub Actions] [OIDC] [S3] [CloudFront]

Zero long-lived credentials: GitHub Actions federates into AWS via OIDC and assumes a scoped role at deploy time, then syncs S3 and invalidates CloudFront.

Homelab – 3-node GitOps platform (on-prem)

[Docker] [GitOps] [Caddy] [Tailscale]

One repo as source of truth across a workstation/Alt server, a NAS and a public VPS – nodes deploy by pulling from Git, no manual changes. GPU model serving, 5-copy Git redundancy with tested DR, Caddy + TLS, Tailscale mesh over CGNAT.

EDUCATION

Ing. de Ejecución en Computación e Informática

Instituto Profesional Virginio Gómez

CERTIFICATIONS

AWS Certified Solutions Architect – Associate (SAA-C03) · 2025–2028

LANGUAGES

- Spanish – native
- English – professional working proficiency (current work language at Citi)
